

## PLACEMENT CONCLUSION

|        | Sl.no | Ssc_p     | Hsc_p     | Degree_p  | Etest_p   | Mba_p     | Salary        |
|--------|-------|-----------|-----------|-----------|-----------|-----------|---------------|
| Mean   | 108.0 | 67.303395 | 66.333163 | 66.370186 | 72.100558 | 62.278186 | 288655.405405 |
| Median | 108.0 | 67.0      | 65.0      | 66.0      | 71.0      | 62.0      | 2650000.0     |
| Mode   | 108.0 | 62.0      | 63.0      | 65.0      | 60.0      | 56.7      | 300000.0      |

The descriptive analysis of the placement dataset provides a clear overview of student performance. The average academic scores for SSC, HSC, and Degree are consistently around 66% to 67%. For these variables, the mean and median values are nearly identical, which indicates a normal distribution of marks.

A key observation is that the Employability Test (etest\_p) has the highest average of 72.10%, which is comparatively higher than all academic scores. This suggests that students tend to perform better in skill-based assessments than in traditional academic examinations, reflecting their additional focus and preparation for placement activities.

In terms of salary, the mean value of Rs. 2,88,655 is greater than the median value of Rs. 2,65,000. This difference shows a right-skewed distribution, where a few students with very high salary packages have increased the overall average. The mode of Rs. 3,00,000 indicates that this is the most common salary package offered to the majority of students.

To conclude, a consistent academic record of 60-70% combined with a strong performance in the employability test secures a standard placement package of 3 Lakhs.
